Mr. John Towell
Chief Manager
Mid South Prestress, LLC/Hoosier Prestress, Inc.
2949 Joe Dowlen Road
Pleasant View, TN 37146

Dear Mr. Towell:

Congratulations! You successfully completed your latest PCI Plant Certification audit. Please find enclosed a copy of your audit report.

This audit was conducted on 6/20/03 and 6/23/03 for your plant in Pleasant View, TN. This continues your certification in good standing in the PCI Plant Certification Program in product group and category C3.

Certified plants undergo at least two unannounced audits annually. Strict compliance with detailed industry standards is necessary to retain certification. Standards are found in the nationally recognized PCI quality control manuals MNL-116, -117, and -130. Failure to achieve these minimum standards will result in decertification. Specially qualified and accredited engineers from Ross Bryan Associates, Inc., Nashville, perform all plant audits on behalf of PCI, to ensure a high degree of independence, consistency, and uniformity in the program.

Beginning in 2004 a written response showing the corrective actions taken to the nonconformance's noted in appendix B must be sent to the PCI within 30 days of receipt of this letter and the enclosed audit report.

PCI is recognized as a quality assurance agency by the National Evaluation Service, representing BOCA, SBBCI, and by the International Accreditation Services, Inc. (formerly part of ICBO Evaluation Service, Inc.) The program is highly recommended by the Federal Highway Administration and is required in the specifications of most Federal Agencies and State Departments of Transportation as well as by numerous municipalities.

For further information, please contact the Director of the Certification Programs.

On behalf of the Precast/Prestressed Concrete Institute and the PCI Plant Certification Committee, congratulations on your continued certification.

Sincerely,

John A. Wilke

John A. Wilke
Director of Certification Programs
